OBJECTIVE

Aspiring Full Stack Web Developer with expertise in HTML, CSS, JavaScript, and React.js on the front end and solid background knowledge in Java and Spring Boot on the back end. I'm looking for a chance to work on creative web application projects where I can apply my technical expertise, pick the brains of professional software developers, and develop as a team player.

EDUCATION

2024 - present
SRI VENKATESWARA COLLEGE
OF ENGINEERING

- B.E. – Computer Science and Engineering
- CGPA: 8.5

ST. SEBASTIAN MAT. HR. SEC.
SCHOOL

- HSC 2nd Yr – 92%
- HSC 1ST Yr – 90%
- SSLC – 95%

TECHNICAL SKILLS

- Frontend: React.js, HTML5, CSS3, and JavaScript
- Backend: Spring Boot (Basics) and Java
- Platforms & Tools: VS Code, and Git
-

PROJECTS

Frontend Only Noise Website Homepage Clone:

🔑 Tech stack: React.js

- To practice contemporary frontend development techniques, a static clone of the Noise website's homepage was made using React.js.
- Backend functionality and dynamic product rendering (static UI clone) are not included in the project.

Current Location-Based Weather Detection:

🔑 Tech stack: JavaScript, HTML5, CSS3, OpenWeatherMap API, Geolocation API

- created a basic web application that can identify the user's location and show current weather data, including temperature, humidity, and conditions.
- learned how to use fetch() to handle asynchronous requests, work with third-party APIs, and dynamically update the user interface in response to API responses.

SOFT SKILLS

- Teamwork
- Multitasking
- Critical Thinking
- Event Management
- Communication

LANGUAGES

- Telugu
- English
- Tamil

ACHEIVEMENTS & CERTIFICATES

- Participated in “SPARK SCIENCE” event conducted by Science club, SVCE.
- Completed MongoDB Basics for Students course on MongoDB site.
- Completed C Programming course on Infosys Springboard with basic concepts and hands-on practice.
